

DEEP DOWN YOU WANT THE BEST

THE GALILEO HUD

IN-SIGHT. HEADS-UP. MASK-MOUNTED.

EXPERIENCE THE FUTURE OF DIVE COMPUTER TECHNOLOGY – RIGHT BEFORE YOUR EYES.

There's never been anything like it. The new Galileo HUD is a massive leap forward in computer diving that will forever change the way you dive.

This new-to-the-dive-world, technologically-advanced computer offers a heads-up display that is mounted on a diving mask. Delivering excellent readability along with hands-free data monitoring, with the introduction of the Galileo HUD, SCUBAPRO engineers have created a user experience unlike anything previously seen in diving.

“FLOATING” DISPLAY

Using precision near-eye optics, this “floating” display creates a micro OLED screen image with superior readability that appears at a virtual distance of approximately 3ft/1m. This allows you to keep your eyes on both your dive data and the underwater scenery at the same time, without needing to refocus.

HANDS-FREE DATA MONITORING

Super-convenient for photographers and tech divers. Also, since you don't have to raise an arm or reach for a console to check your dive data, the lightweight (neutrally-buoyant) HUD allows you to maintain a more streamlined profile moving through the water.

SINGLE-KNOB USER CONTROL

When it comes time to change screens or make adjustments, an intuitive push-wheel allows you to access functions with one hand. Simply rotate it to navigate up and down within a menu, or increase or decrease a user setting.

FLIP-UP HINGE

Enables you to tilt the HUD display up and out of the way when not needed. When it's time to resume data monitoring, simply tilt the display back down into position and you're ready to track your dive.

AIR INTEGRATION

Easily monitor tank pressure with wireless communication between computer and tank.

NAVIGATION

Find your way topside with an integrated GPS or under water with a full-tilt compass.

SUMMARY OF DIVE
Additional Information

G2

For special operations the G2 has customized military software:

The mode is advanced bottom timer, which is used for UW navigation.

Like with the standard G2, audible tones can be switched off for stealth mode.

Further software changes can be done upon request.

WIRELESS AIR INTEGRATION

Eliminates a hose, plus provides support for up to 9 transmitters when all features are activated.

HUMAN FACTOR DIVING

Integrated heart rate monitor lets you visually track your heart rate and skin temperature to ensure you stay in your individual target zone to maximize safety at depth.

G2C

CELL PHONE-STYLE

Screen is familiar and very easy to read at depth.

QUICK-DISCONNECT

Air integration system enables you to separate computer from HP hose for easy post-dive data downloading, traveling, and safe storage.

ULTRA-DURABLE BOOT

Protects the casing against bumps and includes hose protection to safeguard the quick-disconnect fitting.

DIVE MODES

Scuba, Gauge, and Trimix.

Need navy screen

Z1

Freediving, Scuba and Gauge modes, and the ability to accommodate four gases, it goes where you go.

POWERED BY THE SUN

When exposed to any type of light, the Z1's internal battery is charging. No more charging cords or electrical outlets; no more battery disposal.

PERFECT FOR TRAVELING

Imagine where you can go without the need to recharge.

VERSATILE & DURABLE

A full-featured watch and an easy-to-use computer. Its lightweight construction is a hybrid of stainless steel and polyacrylate resin.

SCUBAPRO STANDS FOR QUALITY.

You can dive with total confidence when you dive with a SCUBAPRO regulator system. Quality, reliability, and superb breathing performance – that's what SCUBAPRO engineers strive for, and that's what SCUBAPRO regulators are known for.

It's a stellar reputation well-earned from over five decades of cutting-edge engineering and industry-changing innovation that has changed the face of scuba. With a SCUBAPRO regulator you can focus on the underwater experience, not your gear. This is why divers depend on SCUBAPRO.

OVER A HALF-CENTURY OF ENGINEERING EXCELLENCE.

SCUBAPRO leads the dive-equipment industry in innovation, creating numerous products that have changed the face of scuba. Every decision that goes into our products – from design and manufacturing to engineering and packaging – is based on quality and performance, not price. Nowhere is this commitment more apparent than in our full line of high-performance regulator systems.

WE SPARE NO EXPENSE IN R&D.

SCUBAPRO invests heavily in product development. Our state-of-the-art R&D facility in Italy is fully equipped with the latest breathing machines and long-term cycle testing machines, as well as the most sophisticated data collection tools, all to ensure bulletproof reliability in our regulator systems. Our tests are comprehensive and intensive, far surpassing industry standards.

UNEQUALLED PERFORMANCE.

SCUBAPRO regulators not only perform well in our testing, but also perform incredibly well over time for divers around the world. Designs engineered by teams with years of experience and thousands of dives are brought to life with high-end materials and tooling. The result is the ultimate in reliability.

Our regulators look good on the outside, but the engineering excellence underneath is what counts the most. Every SCUBAPRO regulator carries a 24-month/100-dive service interval and, if purchased through an Authorized Dealer, is covered by a lifetime, worldwide warranty.

A NAME DIVERS TRUST.

The best endorsements for SCUBAPRO regulators come from the divers who use them. On dive boats and in diving circles the world over, SCUBAPRO regulators have a reputation for performance and dependability. Our popularity is highest among professional divers and instructors, who own SCUBAPRO products with pride. When you dive with SCUBAPRO, you're diving in good company.

1ST

INDUSTRY LEADERS IN REGULATOR INNOVATION.

SCUBAPRO regulator systems consistently outshine the competition in independent regulator tests, delivering reliable, low-effort airflow regardless of depth, tank pressure or breathing rate.

- Air-balanced flow-through piston regulator on the market.
- Second stage with an adjustable balanced valve.
- Alternate-inflator regulator integrating the BCD inflator with a second stage.
- Adjustable VIVA [Venturi Initiated Vacuum Assist].
- Patented Extended Thermal Insulating System [XTIS], which transforms the MK25 EVO – widely considered the most powerful first stage in diving – into diving's premier high-performance cold-water regulator.

X-TEK LINE

SCUBAPRO's X-TEK Series offers the ultimate in customization and technical performance. This modular system is just as comfortable on warm-water, recreational reef dives as it is on sidemounted multi-tank dives in shipwrecks or caves. As your skills and needs change, the X-TEK line can change and expand with you. There are six different harnesses that can fit all technical needs plus two different flotation wings and two back plates.

FINS

SEAWING NOVA / SEAWING NOVA GORILLA

Setting the bar in dive fin design, the multiple-award-winning Seawing Nova combines classic SCUBAPRO fin technology with the latest innovations in hydrodynamic design to deliver incredible power, acceleration and maneuverability with total kicking comfort. You will be hard-pressed to find a fin that's more comfortable to wear during extended dives and delivers a more powerful, efficient kick for cruising the underwater world.

**HEAVY DUTY BOOT
6.5MM**

JET FINS

The Jet Fin set the standard for power and durability when it was introduced 50 years ago. Today, tech divers, military divers, commercial divers and dive instructors still strap on Jet Fins before hitting the water. Stainless-steel spring heel straps last forever and make donning and doffing quick and easy. Each fin includes a pairing hole that allows the fins to be hung or stored together.

**ALPHA BOOT
4MM**

GO SPORT

SCUBAPRO introduces the GO Sport, featuring a "Boot-Fit" design for divers who wear boots. It offers the same functions and features as the original GO fin, plus a whole lot more.

SELF-ADJUST HEEL STRAP

Replaceable bungee strap allows for a versatile fit and makes the fin easy to don and doff.

LIGHTWEIGHT DESIGN

Increases convenience when traveling and comfort in the water.

FINE-TUNED BLADE DESIGN

Provides mounting points to attach skegs that minimize sideslip and maximize stability. Available in a variety of colors.

EVERFLEX BOOT, 5MM

MASKS

FULL-FACE MASK

SCUBAPRO's Full-Face Mask is a professional-quality mask designed for maximum safety and comfort while diving in very cold water, diving in wrecks or caves or when technical diving. The design is also ideal for using a secondary air source, diving in contaminated environments or employing an underwater communication system. The mask is widely used by military and commercial divers worldwide.

FRAMELESS/ FRAMELESS GORILLA

SCUBAPRO's classic Frameless is diving's original frameless mask and it continues to be the mask of choice among professional divers throughout the world. Its single lens design features a distinctive rectangular shape that provides an excellent view on the periphery as well as straight ahead. The soft silicone skirt is comfortable yet durable, and the double-edge seal feels good against the skin. The Frameless Gorilla has a slightly larger and wider lens, and a slightly larger skirt in a matte finish.

SEARCH & RESCUE / FIREFIGHTERS SUITS

Available in the following models: Everdry 4 [see drysuits]; NovaScotia 7.5mm semi-dry; Oneflex 7mm and 5mm hooded steamers, 3mm hoodless steamers and 2.5mm shorty.

Suits feature special high-visibility yellow/red safety colors with additional reflective panels and logos. A pocket positioned on the right leg is included on all suits except the 3mm steamer and shorty.

Graphics and panel design developed for higher resistance against harsh wear & tear.

X-Foam formula neoprene with solvent-free glue for assembling.

Pure Design Concept uses fewer seams and panels for maximum flexibility.

Heavy-duty kneepads and material on shoulders and seat cushion the diver while protecting the suit from abrasion.

Suits can be custom made for a minimum order of 50 suits.

DRYSUITS

EVERYDRY 4

This premium-plus compressed neoprene drysuit offers the streamlined fit, comfort and flexibility of a wetsuit with the thermal properties and water-tightness of a drysuit. The dense 4mm neoprene resists compression at depth so the drysuit can be worn with a thin undergarment or no undergarment at all. Features include protective shoulder and knee panels, a comfortable plush interior, ultra-smooth wrist seals, blue suspenders, and much more. Built for comfort and extended wear, the Everdry 4 fits like a glove, offers excellent range of motion, and most importantly, keeps body heat in and cold water out.

Includes a hood, carry bag, low pressure hose, suspenders, repair kit and owners manual.

EASY DON DRY

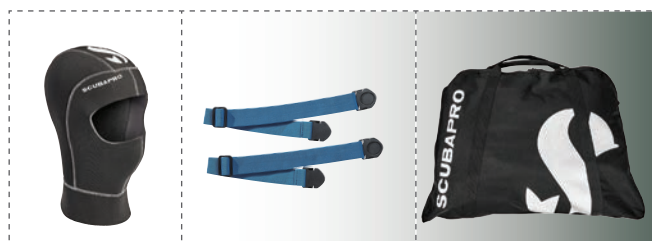

HEAVY DUTY

DEFINITION DRY

Targeted to advanced divers looking for a quality mid-range drysuit, the Definition Dry is built to last. It is made with a new heavy-duty poly/butyl/poly trilaminate blend plus a stitch-glue-waterproof tape seam assembly. Though built tough, it is lightweight and offers a comfortable, streamlined fit.

Includes a hood, carry bag, low pressure hose, suspenders, repair kit and owners manual.

SI TECH
PROFESSIONAL SAFETY SOLUTIONS - MADE IN SWEDEN

EVERTEC DRY BREATHABLE

The Evertech Dry Breathable is a premium trilaminate drysuit designed for avid divers and loaded with features. Built with a breathable fabric nylon/PU/nylon trilaminate blend, stitched and waterproof taped-twice seams, a diagonal front waterproof zipper, a Si-Tech ring seal system for wrists and neck and Si-Tech valves, this fabric suit is top quality throughout. A pair of large cargo pockets, light-weight attached boots and blue suspenders are just a few of the standard features included with a suit designed to keep you warm, dry and comfortable in all water conditions.

Includes a hood, carry bag, low pressure hose, suspenders, repair kit and owners manual.

LIFT BAGS

Polyester fabric, double sided PVC coated and lacquered, upside high-gloss embossed, flame retardant according to DIN 75200. Fabric is 100% made in Austria and meets REACH requirements. Available sizes: 15kg/33lbs, 30kg/66lbs, 50kg/110lbs, 100kg/220lbs, 200kg/441lbs, 500kg/1102lbs, 1000kg/2205lbs, 1500kg/3307lbs, 2000kg/4409lbs.

DRYSUIT UNDERGARMENTS

K2 EXTREME COLD-WATER THERMAL PROTECTION

One-piece steamer design made of a breathable and stretchy dual fleece material for maximum thermal protection. Includes compression padding on shoulders, chest and knees, hip pockets with zippers, and elastic wrist loops and heel straps. Unisex sizes.

K2 LIGHT TEMPERATE-WATER THERMAL PROTECTION

Pants and long-sleeve tops, made with a light grid plush material that's breathable, warm and stretchy. Includes elastic wrist loops on the tops and heel straps on the pants. In unisex sizes.

K2 MEDIUM MID-RANGE THERMAL PROTECTION

Warm and stretchy. Compatible with trilaminate drysuits. Pants and long sleeve tops with side and chest pockets. Includes elastic wrist loops on tops and heel straps on pants. Unisex sizes.

ACCESSORIES

K6

SCUBAPRO's all-purpose K6 knife features a quality stainless steel blade with a fine hollow-ground cutting edge on one side, a serrated edge on the other, plus a notch for cutting line. It features a 6.1in/15.5cm stainless steel blade plus a stainless hammer in the ergonomic grip handle. It includes an injected molded sheath and two quick-adjusting buckle straps.

MAKO KNIFE

The ultimate compact dive knife offers a multi-function blade [3.5in/8.5cm] that includes a serrated edge, a conventional edge, a line-cutting notch and a bottle opener. The Tanto tip, with its angled shape, is one of the strongest knife points available. Offered in stainless steel or titanium. Locking sheath features a convenient one-hand release mechanism. Overall length 7.5in/19.7cm long.

TK 15

Single-piece stainless steel blade features both smooth and serrated edges along with a shackle key and a line cutter. The knife comes with a heavy-duty handle and fiberglass-reinforced polyamide sheath.

MESH CUTTER

This multi-purpose cutting tool is designed to be used with a pulling rather than pushing motion; this provides much better leverage, more cutting power, and improves safety.

NOVA 720/ NOVA 720 WIDE

The Nova 720 dive light offers 100% and 50% power modes, twist-on/twist-off activation, double O-ring seals, easy-grip diamond-shaped knurling on both handle and light head, and an over-pressure valve to release battery off-gassing. The Nova 720 Wide comes with a wider 80° beam. Both are depth-rated to 1000ft/300m and use 3 C-cell batteries. [Batteries sold separately.]

NOVA 720R/ NOVA 720R WIDE

The rechargeable Nova 720R is much more compact than the Nova 720 yet offers the same rugged aluminum construction and delivers the same high-intensity 720-lumen illumination. It is also available with a wider 80° beam. Ideal for night diving. [Battery sold separately.]

BAGS

DIVE N'ROLL

One rigid rolling case plus one removable soft bag equals a hassle-free gear transport system. The large main compartment holds lots of gear and includes reinforced saltwater-resistant wheels and a telescopic tow handle. Additional packing space in the soft lid is ideal for stashing clothes. The detachable backpack is made from HD Tarpaulin. Made of 1000D polyester with YKK Vislon zippers.

28x18x16in/71x46x41cm.

Weight: 14.0lbs/6.5kg. **Volume:** 37.0gal/140L.

DUFFLE W/WHEELS

This heavy-duty traditional duffel-style bag is built tough. It comes with wheels for rolling transport as well as double duffel handles and a backpack system. The main compartment is cavernous, and it's supported by a long top pocket that's accessible from both sides. A pair of external compression straps keeps the load tight, and the Vislon YKK zippers are rugged and dependable.

30x14x11in/76x36x28cm.

Weight: 6.0lbs/2.7kg. **Volume:** 20.0gal/75L.

BACKPACK

This versatile backpack provides lots of storage space in five compartments. The rear compartment is ideal for clothes and other belongs. There's one intermediate padded compartment for a laptop or e-tablet, and another for documents. Two easy-access front compartments hold passport, wallet, cell phone, keys and other small items. Side compression straps rein in partial loads, and high-grade 3D Airmesh backing is provided for carrying comfort.

10x6x19in/25x15x47cm.

Weight: 3.3lbs/1.5kg. **Volume:** 5.0gal/18L.

PORTER

This big carrier offers lots of volume to handle your gear, plus its versatile semi-rigid design includes saltwater-resistant wheels and a retractable double bar tow handle for rolling, backpack straps for shouldering, and handles on sides, top and bottom for lifting. Made of 1000D polyester with YKK Vislon zippers, the Porter gets the tough jobs done with room to spare.

32x18x14in/80x45x35cm.

Weight: 11.0lbs/5.0kg.

Volume: 33.0gal/126L.

CABIN BAG

This is an ideal carry-on bag for traveling fast and light. The main compartment features a YKK Vislon zipper. Two front pockets and an inside mesh pocket provide storage for smaller items. The retractable double-bar tow handle makes for convenient rolling transport. Multiple handles are provided for carrying and lifting. Meets IATA requirements.

22x14x8in/55x35x20cm.

Weight: 8.2lbs/3.7kg. **Volume:** 12.0gal/46L.

SLING BAG

An efficient carry pack for everyday use, the Sling Bag offers a grab handle plus an ambidextrous shoulder strap. The main compartment includes an internal pouch for an e-tablet. The front compartment's organizer is perfect for storing wallet, phone, keys, binoculars, an admin kit or hand-wipes, and there's an easy-access rear compartment for extras. High-grade 3D Airmesh on the back makes for comfortable carrying.

9x4x12in/23x9x30cm.

Weight: 1.5lbs/0.70kg. **Volume:** 1.6gal/6L.

MESH BAG

It is made of durable mesh yet it is still lightweight and folds easily for storage.

30x14x14in/75x35x35cm.

Weight: 1.80lbs/0.80kg.

Volume: 24.0gal/92L.

WEIGHT BAG

Carry ballast weight safely and easily. Built from standard 600D polyester PU and 450D Rip-stop for strength and durability, the interior lining of this bag is 150D polyester and includes additional coated mesh for quick drying. Double-handle webbing encircles the bag for added strength and joins to form a padded handle. A YKK Vislon double-slider zipper makes it easy to access the compartment.

12x6x6in/31x15x16cm.

Weight: 0.86lbs/0.39kg. **Volume:** 1.9gal/7L.
