

## Neptunus **TARS** - Tactical Airborne Rescue System (FR)

Equipnor AB have developed and delivered a tactical maritime vest for Airforce rescue swimmers. The system is certified and in use in rotary wing configurations for military rescue swimmers.

### **Made in Sweden**

This system is made in Flame Retardant materials and complies to FR-standards. The vest itself has buoyancy bladders and an oral inflation system. This vest can be modified to work in conjunction with an automatic inflation/emergency breathing system. The vest in this configuration holds a flotation collar (FR) using both manual and automatic inflation systems.
